## PINE VALLEY SENIORS NEWS

Winnie Anderson, Ray Quinn, Bernice Westgate, Virgil Gonvick, Judy Gonvick and Eva Thomson of the Pine Valley Seniors traveled to Trail, Castlegar and Nelson BC to participate in the Summer Games. Although they didn't win any trophies or medals they had a great time. This trip was made possible with money donations from local businesses.

## DAWSON CREEK RCMP NEWS RELEASE

At approximately 6pm on August 24, 2011 the RCMP and Emergency Crews were dispatched to a multi-vehicle collision on Highway 79 South near 223 Rd. The collision occurred in a construction zone. RCMP members arrived and observed five vehicles damaged in the incident. There were a total of 13 persons in these vehicles and four of these people were sent to hospital with minor injuries. All of these people were released from hospital a short time later.

The RCMP would like to remind the motoring public to reduce your speed and be extra cautious on the roads in and near construction zones. The extra attention and slower speed is appreciated by the work crews and other drivers in the area. The extra seconds taken to get through a construction zone safely is well worth the time.

Speeding fines are increased in construction zones and start at \$196 and range up to \$483 for excessive speed and a 7 day impoundment of vehicle.

## B.C.'S TRANSPLANT TEAMS SET NEW RECORDS... AGAIN!

BC Transplant and transplant recipients across the province are celebrating this summer with a record number of transplants performed in one month. July 2011 set the record for overall transplants in B.C. as well as the record month for liver transplants.

The total number of transplants performed in July was 35, which is the highest number ever in a single month and the highest since BC Transplant, an agency of the Provincial Health Services Authority (PHSA) was formed 25 years ago. The previous record was in September 2007 with 34 total transplants.

These transplant surgeries were performed by highly-skilled teams at Vancouver General Hospital, St. Paul's Hospital, and BC Children's Hospital.

Vancouver General Hospital (VGH) performed 11 liver transplants, which is the most liver transplants completed in a single month in the *history of liver transplantation in B.C.* The previous record was in May 2000 with 10 liver transplants. On average, there are three to four liver transplants performed each month. In 2010, there were 53 liver transplants, also a record announced earlier this year.

"Some of these patients have been waiting over a year for their transplant, and it was gratifying to see so many patients getting a second chance at life," says Tara Smith, RN, recipient coordinator, VGH.

Vancouver General Hospital, part of Vancouver Coastal Health, is the only liver transplant centre in B.C. The record

number of liver transplants performed included deceased donor liver transplants (from a donor after brain death or cardiac death) and live donor liver transplants (when a portion of a liver is removed from a healthy friend or relative and given to the recipient).

"We think this dramatic increase in transplant activity can be attributed to the work of ICU physicians across the province who are increasing awareness around organ donation by talking to the families of potential donors," says Dr. Charles Scudamore, Medical Director, Liver Transplant Program, BC Transplant.

"The success of our program stems only from the generous gift of life and the remarkable legacy left behind by the donor and their families," continues Dr. Scudamore, who is also a liver transplant surgeon at Vancouver General Hospital. "We extend our hearts in sincere gratitude for their gift during a difficult time in their lives."

There are many factors that contribute to the number of organ transplants performed each year, such as organ suitability and match on the waitlist as well as awareness of and registration on B.C.'s Organ Donor Registry. In addition, programs such as PHSA's Living Donor Expense Reimbursement program (administered by the Kidney Foundation of BC) and the National Paired Kidney Exchange (operated by Canadian Blood Services) enable more people to be living donors, and deceased organ donation is no longer limited to patients who died as a result of brain death but now includes cardio-circulatory death.

It takes only a few minutes to register your decision on organ donation on B.C.'s Organ Donor Registry at [www.transplant.bc.ca](http://www.transplant.bc.ca). What are you waiting for? Do it today!

## HAMMER HEADED BAT

Found in the rain forests of Africa, this large bat gets its name for the huge, strangely shaped head of the males. Most of the male's thorax is actually a resonating chamber that allows them to produce very loud calls to attract females. They feed on fruit and, occasionally, on other animals.
