KEEPING PACE WITH B.C.'S MODERN WORKPLACE

Labour Minister Murray Coell released the following statement in recognition of Labour Day:

"Labour Day is a time to reflect on some of the challenges workers have faced in over one and a half centuries of labour in our province, and how labour laws have evolved and must continue to evolve to keep pace with B.C.'s modern workplace."

"Government, employers and employees, unions and workers, have made great strides in ensuring our workplaces are safe, and that 1,800,000 British Columbians in the province's workplaces are treated in a fair and equitable way."

"Since 1858, when the bulk of workers entered B.C. during the Gold Rush era, through to present day, the workplace has changed. Looking forward, we will face new challenges. For example, the baby boom generation - comprising approximately one-third of B.C.'s population - has begun to retire from the workforce, or move from full-time to part-time work, and will continue to do so over the next two decades. This will bring a new set of challenges when recruiting and retaining the next generation of workers."

"Miniaturized communication devices bring huge convenience to our lives, but these technologies pose questions our predecessors never had to consider. How do we create a work environment flexible enough to accommodate the needs of the changing workplace and desire of those within it to balance the demands of work and family life? How can we best resolve disputes in an ever changing workplace? How do these changes affect today's labour laws?"

"The objective of government is to remain responsive to workplace needs. Clearly, the workplaces of the future will be different than those of today. To that end, my ministry will continue to monitor the workplace and examine ways that best ensure our laws remain relevant to this changing environment."

"I invite you to reflect on the sacrifices of B.C.'s early workers, and the benefits and protections often taken for granted today that were built on the shoulders of these men and women. Looking ahead, government will seek ways to improve upon the current framework within which mutually beneficial, healthy labour and employment relationships can continue to flourish."

Some Animals Just Don't Need Males
Did you know that there are certain animal species where there are no males only females. This is fairly common among insects and worms but also occurs to a lesser extent in some lizards. Due to only one sex existing the females are actually able to lay eggs without the need of a male (i.e. no fertilization is required).

ARE YOU A CARROT, AN EGG OR A COFFEE BEAN?

A young woman told her mother how hard her life was. She didn't know how she was going to make it and wanted to give up. She was tired of fighting and struggling. It seemed that as she solved one problem, a new one arose.

Her mother took her to the kitchen. She filled three pots with water. In the first pot, she placed carrots, in the second, she placed eggs, and in the last one, she put ground coffee beans. She let them sit and boil without saying a word.

After about 20 minutes, she turned off the burners. She fished the carrots out and placed them in a bowl. She pulled the eggs out and placed them in a bowl. Then she ladled the coffee out and placed it in a bowl.

Turning to her daughter, she asked, "What do you see?" "Carrots, eggs and coffee," the daughter replied.

The mother brought her closer and asked her to feel the carrots. She did, noting that they had become soft. The mother then asked her to take an egg and break it.

Pulling off the shell, she observed the hard-boiled egg. Finally, the mother asked her to sip the coffee.

The daughter smiled as she tasted its richness.

"But what's the point, mother?" the daughter asked. Her mother explained that each of these things had faced the same adversity—boiling water—but each reacted differently.

The carrot went in strong, hard and unrelenting.

However, subjected to the boiling water, it softened and became weak.

The fragile egg had an outer shell to protect its liquid interior.

But after going through the boiling water, it became hard inside.

But the ground coffee beans were different. When they were in the boiling water, they transformed the water.

"When adversity comes knocking," the mother asked, "how do you respond?"

Are you a carrot, an egg, or a coffee bean?"

Which are you? Are you like the carrot that seems strong, but with pain and adversity, do you wilt, become soft and lose your strength?

Are you like the egg that starts with a flexible heart, but changes with the heat?

Did you start out with a fluid spirit, but after a loss, a breakup, a financial hardship or some other trial, have you become hardened and stiff? Does your shell look the same, but is your inside bitter and tough with a hardened heart?

Or are you like the coffee bean? When the water gets hot, the coffee bean releases its fragrance and flavour for everyone's benefit. The coffee bean uses the hot water, the very

circumstances that bring the pain, to transform itself and the water.

When times are darkest and trials their greatest, do you elevate to another level?

If you are like the coffee bean, when things

are at their worst, you can improve yourself and transform the situation around you. Don't tell Life how big your storm is.

Tell the storm how big your LIFE is!

DID YOU KNOW... The Rattus is native to India, but it has spread to almost everywhere in the world. This rat has directly caused, or contributed to, the extinction of multiple wildlife species including a variety of birds, plants and other small mammals. They're blamed for the incredible decline in seabirds on several islands, including many Hawaiian species.
